***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 16-24, drawn to a method for operating a fuel cell system.

Group II, claim(s) 25-31, drawn to a fuel cell system.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Bitsche et al. (U.S. Patent No. 6,380,638) teach a fuel cell system that comprises a fuel cell for supplying an electric load with power and a battery (energy storage device). Figure 1 and Col. 2, Lines 50-65. Additionally, Bitsche teaches that the system comprises switches that are configured to disconnect and connect the fuel cell and battery to the electric load. Figure 1. The switches and their controller are collectively a switching device. The switches operate independently of one another because the same switch is not required to connect/disconnect either the fuel cell or the storage device from one another. Accordingly, because Bitsche et al. teaches all the special technical features of the invention of Group II, Groups I and II do not share a special technical feature, as is required for unity of invention.

A telephone call was made to Thomas Canty on January 19, 2009, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
